DETAILED ACTION

1. This Application has been examined. The claims 21-26 and 28-29 are pending. The examination results are as following.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 21-26 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-16 of U.S. Patent Application Publication No. 2002/0126103. Although the conflicting claims are not identical, they are not patentably distinct from each other because the current Application 09/998,220 and Patent Application Publication No. 2002/0126103 recite the same limitations: "an acoustic wave switch including a deformable dome overlaying the touch sensitive surface; an acoustic wave absorbing material that contacts

Application/Control Number: 09/998,220 Page 3

Art Unit: 2629

the touch sensitive surface". However, the different between the current Application 09/998,220 and Patent Application Publication No. 2002/0126103 that the current Patent Application Publication No. 2002/0126103 does not teach "an acoustic wave absorbing material disposed between the deformable dome and the touch sensitive surface such that in response to a force acting on the dome". It would have been obvious to one of ordinary skill in the art to have an acoustic wave absorbing material disposed between the deformable dome and the touch sensitive surface such that in response to a force acting on the dome as claimed invention because Patent Application Publication No. 2002/0126103 does teach "a deformable dome positioned over the touch surface", and "thereof an acoustic wave absorbing material that contacts the touch surface of the acoustic cavity when the dome is deformed to actuate the switch", that is the same meaning of "the acoustic wave absorbing material disposed between the deformable dome and the touch sensitive surface such that in response to a force acting on the dome (see claim 16).

Allowable Subject Matter

- 4. Claim 29 is allowed (see previous office action).
- 5. Claim 28 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims (see previous office action).

Response To Arguments

6. Applicant's arguments with respect to claims 21-26 and 28-29 filed on 2/8/08 have been considered but are most in view of the new ground(s) of rejection.

Correspondence

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to KIMNHUNG NGUYEN whose telephone number is (571)272-

7698. The examiner can normally be reached on MON-FRI, FROM 8:30 AM-5:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Richard Hjerpe can be reached on (571) 272-7691. The fax phone number for the

organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
